Udhaya Gayathri Prabhakaran

QA Engineer | Manual & Automation Testing | AI-Assisted Testing

[City, State] | [Phone] | [email@example.com] | [linkedin.com/in/your-profile] | codebyug.github.io

PROFESSIONAL SUMMARY

QA Engineer with hands-on experience in manual, functional and regression testing, defect tracking and test case design at Infosys and on freelance projects. Analytical and data-focused, with growing skills in test automation, AWS and AI-assisted testing, and a drive to own quality from development through deployment.

CORE SKILLS

Testing: Manual, functional, regression, smoke and exploratory testing; test case design; UAT support; defect lifecycle; SDLC/STLC; Agile/Scrum

Automation, API & Data: Selenium / Playwright [keep only what you have used], Postman, REST API testing, SQL data validation, Git, CI/CD awareness

AI-Assisted Testing: Prompt engineering for test cases and test data; ChatGPT, Claude, Copilot; evaluating AI output for accuracy, consistency and hallucinations

Cloud & Platforms: AWS (S3, EC2, Lambda, CloudWatch, IAM, RDS basics), Segment (CDP), CRM (HubSpot / Salesforce / Zoho) [keep only what you have used]

Tools: Jira, TestRail, Confluence, browser DevTools, Power BI, Excel / Google Sheets, Shopify, Canva

PROFESSIONAL EXPERIENCE

Freelance QA Engineer | *Remote* 2024 – 2026

- Tested web and mobile apps for small businesses and startups (functional, regression, cross-browser, usability); wrote test cases and detailed bug reports with screenshots and recordings.
- Validated REST APIs in Postman and automated regression checks with [Playwright / Selenium], tracking defects in Jira [adjust to match your work].
- Used AI tools (ChatGPT, Claude, Copilot) to generate test scenarios, edge cases and test data, verifying every output by hand.
- Tested AWS-hosted apps using S3, CloudWatch logs and IAM access, and validated Segment (CDP) event tracking and data flow to downstream tools [keep if accurate].
- Tested CRM workflows in [HubSpot / Salesforce / Zoho], including lead forms, contact records, field mapping and data sync [keep if accurate].

Shopify Consultant (Freelance) | *Remote* 2023 – 2024

- Configured Shopify stores (products, variants, collections, pricing, inventory, shipping, checkout) and tested end-to-end purchase flows before launch.
- Kept product data accurate across bulk uploads using spreadsheets, and designed product images and store content in Canva.

Junior Data Analyst | *[Company Name], [City / Remote]* 2021 – 2022

- Built and maintained Power BI dashboards and reports for [business team], turning raw data into clear metrics for decision-making [keep if accurate].
- Cleaned and validated data from Excel and SQL sources, checking accuracy and consistency before reporting [keep if accurate].

QA Engineer | *Infosys, Tampa, FL* May 2017 – Dec 2017

- Designed and executed manual test cases for [application / client domain], covering functional, regression and smoke testing across release cycles in an Agile team.
- Logged, triaged and tracked defects in [Jira / HP ALM], retested fixes, and validated backend data with SQL [keep if accurate].
- Supported UAT and worked with developers, business analysts and onshore/offshore teams to clarify requirements and resolve issues.

EDUCATION

[Degree, Field of Study], [University Name], [City, Country] [Year]

CERTIFICATIONS & PROJECTS

- ISTQB Certified Tester Foundation Level [in progress / planned, list only if true]
- [Test automation or AI / prompt engineering course], [Year]
- Test Automation Practice Project: regression suite using [Playwright / Selenium] and Postman, [GitHub link]
